Course overview

This course is designed to help beginners develop essential digital skills needed for everyday life and work. Learn how to confidently use computers, the internet, and digital devices in a supportive and friendly environment.

Course description

Beginner Digital Skills is an introductory course for individuals looking to improve their basic digital literacy. The course covers fundamental digital skills such as using a computer, browsing the internet, sending and receiving emails, and using common software applications such as word processors. Participants will learn how to navigate digital devices, manage files, and perform simple online tasks like shopping or searching for information. The course is aimed at individuals with little to no experience with digital technology, and lessons are delivered in a clear, easy-to-follow format. By the end of the course, participants will feel more confident in using digital devices and will have the skills needed to participate in the digital world, whether for personal or work-related tasks.

What financial support is available?

We don't want anything to stand in your way when it comes to bringing Adult learning within reach so if you need anything to support you to achieve your goals then speak to one of our education experts during your enrolment journey. Most of our courses are government funded but if you don't qualify or need alternative financial help to access them then let us know.

What other support is available?

All of our digital content, teaching and learning activities and assessments are designed to be accessible so if you need any additional support you can discuss this with the education experts during your enrolment journey and we will do all we can to make sure you have optimal access.
