Course overview

This course is funded by the Department for Education and only open to residents living in non devolved authorities. Maths for Everyday Life is a practical, supportive course designed for Entry Level learners who want to build confidence in using maths in daily situations. Across 12 sessions, you will develop essential numeracy skills through real-life contexts such as shopping, budgeting, understanding simple bills, time and basic measurement. The course introduces simple fractions (e.g. $\frac{1}{2}$, $\frac{1}{4}$) and basic percentages (e.g. 50%, 25%) in familiar situations. You will also learn to read and interpret simple timetables, such as daily routines or basic transport times. Through structured activities and guided practice, you will build confidence in applying maths step by step in everyday tasks.

Course description

Maths for Everyday Life is a 24-hour, non-accredited Entry Level course designed to help learners develop practical numeracy skills for real-life situations. It is particularly suitable for learners working at Entry 1–2 level, with some progression into Entry 3 skills, providing a supportive introduction to using maths with confidence.

Delivered over 12 two-hour sessions, the course covers key areas including number skills, the four operations, money management, time, and basic measurement. Learners will be introduced to simple fractions (such as $\frac{1}{2}$ and $\frac{1}{4}$) and recognise basic percentages (such as 50% and 25%) through practical, everyday examples.

You will apply these skills in familiar contexts such as comparing prices, managing a simple budget, understanding basic bills, reading simple timetables (e.g. daily schedules or transport times), and measuring quantities. Activities are structured and supportive, with clear explanations, step-by-step guidance, and opportunities to practise and repeat skills.

By the end of the course, you will feel more confident using maths in everyday tasks and be better prepared to progress to further maths learning, employment training, or accredited Functional Skills Maths courses.

What financial support is available?

We don't want anything to stand in your way when it comes to bringing Adult learning within reach so if you need anything to support you to achieve your goals then speak to one of our education experts during your enrolment journey. Most of our courses are government funded but if you don't qualify or need alternative financial help to access them then let us know.

What other support is available?

All of our digital content, teaching and learning activities and assessments are designed to be accessible so if you need any additional support you can discuss this with the education experts during your enrolment journey and we will do all we can to make sure you have optimal access.
