Course overview

This course is funded by the West Midlands Combined Authority and is only available to residents living within the West Midlands Combined Authority area. Maths for Work Readiness is a practical Entry 3 course designed to help learners develop the numeracy skills needed for employment and workplace settings. Over 12 sessions, learners will strengthen skills in number, money, time, measurement and data handling through real-life work-related scenarios. Activities focus on tasks such as calculating wages, understanding payslips, managing budgets, measuring materials, reading timetables and interpreting basic workplace information. Delivered in a supportive environment, the course builds confidence and independence. By the end of the course, learners will feel more prepared to apply maths skills in employment, training and further accredited study

Course description

Maths for Work Readiness is a 24-hour Entry 3 course designed to develop the practical numeracy skills required for employment and vocational progression. Many learners at Entry 3 level need support in applying maths confidently in workplace contexts such as understanding wages, calculating hours worked, measuring quantities, managing stock, or interpreting basic data.

Delivered across 12 two-hour sessions, the course covers core areas including whole number operations, money calculations, time and timetables, measurement, simple fractions and percentages, and reading charts or tables. Learning is contextualised through realistic workplace scenarios such as shift planning, budgeting, checking invoices, comparing costs, and understanding deductions from pay.

Sessions are interactive and structured, providing clear explanations, guided practice and opportunities to apply skills in meaningful contexts. Tutors create a supportive, mistake-friendly environment that encourages participation and discussion.

By the end of the course, learners will demonstrate improved confidence in using maths in work-related situations and will be better prepared to progress to Functional Skills Maths, vocational training, or employment opportunities.

What financial support is available?

We don't want anything to stand in your way when it comes to bringing Adult learning within reach so if you need anything to support you to achieve your goals then speak to one of our education experts during your enrolment journey. Most of our courses are government funded but if you don't qualify or need alternative financial help to access them then let us know.

What other support is available?

All of our digital content, teaching and learning activities and assessments are designed to be accessible so if you need any additional support you can discuss this with the education experts during your enrolment journey and we will do all we can to make sure you have optimal access.
